# Noise Report - February

## Concord Hospital Redevelopment

### 1. Project Description and Site Location:

This noise monitoring report is for the Concord Hospital, Stage 1 Redevelopment. The work site is located within the Concord Hospital Campus, as detailed in the aerial photo below.

The Concord Hospital Redevelopment site is bounded by the existing hospital in all directions, namely by the existing Hospital Buildings 3 and 5, Chapel to the north-west and the Palliative Care Building to the north-east. To the south-east of the site is an existing car park and Helipad, and to the south-west is the Hospital Buildings 72 and 73. Further to the south-west are Currawang Street residences.

# Noise Report - February Concord Hospital Redevelopment

## 2. Location of Noise Monitors

There are two locations where the monitors are setup for the Redevelopment. These are located in the below areas:

1. **NMT 1** – Northwest Corner of the site adjacent to Building 75 – nearest receivers Building 75 and 76
2. **NMT 2** – Within the new Atrium (Old Loading Dock) – nearest receivers Building 3 and 5

# Noise Report - February

## Concord Hospital Redevelopment

### 3. Noise Limits

Noise alerts for the noise monitors on site are set to trigger at 85dB. When there is a noise exceedance over 90dB, the monitors trigger a recording of the event taken place.

The noise exposure standards are set according to the WHS Regulations and Safe Work Australia Code of Practice for Managing Noise and Preventing Hearing Loss at Work. The exposure standard for noise is defined in the WHS Regulations as an LAeq,8h of 85 dB(A).

LAeq,8h means the eight-hour equivalent continuous A-weighted sound pressure level in decibels, referenced to 20 micropascals, determined in accordance with AS/NZS 1269.1. This is related to the total amount of noise energy a person is exposed to in the course of their working day. It takes account of both the noise level and the length of time the person is exposed to it. An unacceptable risk of hearing loss occurs at LAeq,8h values above 85 dB(A).

### 4. General Progress Update

The following works have occurred during the month:

- o Jumpform reached Level 2 (4 to go).
- o Materials hoist has been installed.
- o Atrium Steelwork has progressed.
- o Level 1 Pour 2 of IPU1 was poured (39 more suspended slabs to go).

# Noise Report - February Concord Hospital Redevelopment

## 5. Noise Results

### 5.1. Results 03.02.20 to 07.02.20

# Noise Report - February Concord Hospital Redevelopment

## 5.2. Results 10.02.20 to 14.02.20

## 5.3. Results 17.02.20 to 21.02.20

5.4. Results 24.02.20 to 28.02.20

# Noise Report - February Concord Hospital Redevelopment

## 6. Noise Alerts/Exceedances

Noise alerts are set a level of 85dB for this site. Once reached the contractor is notified immediately so they can review the works being undertaken and any further control measures that could be installed or a change in process.

For the month of February 2020 there were no noise alerts or exceedances.

## 7. Appendices

### 7.1. Noise Monitoring Data - Hourly Samples

## Data Samples - Resolution 1 hour
